One lesson with a clear learning outcome

Plan what learners should be able to do, rather than just filling class time.

Three steps

1. Choose a measurable outcome
2. Design one practice activity
3. Check evidence and adjust

A worked example

Outcome	Compare fractions
Practice activity	Pair examples
Evidence of learning	Explain which is larger
Next adjustment	Add visual model

The evidence is an explanation, not simply a completed worksheet.

Adapt to learners and relevant school requirements.

One lesson with a clear learning outcome

Use one row per item or decision. Start with what you know.

Outcome	Practice activity	Evidence of learning	Next adjustment

My next action / when
