Product costing and pricing worksheet

Check whether a selling price covers materials and overhead.

Three steps

1. Calculate unit costs
2. Include selling fees
3. Compare contribution with overhead

A worked example

Product	Print set
Unit cost	4
Fees	2
Price	12
Margin amount	6

12 minus 4 minus 2 leaves 6 before other costs.

Include taxes and other costs separately.

Product costing and pricing worksheet

Use one row per item or decision. Start with what you know.

Product	Unit cost	Fees	Price	Margin amount
